Monitored Smoke Detectors

A monitored smoke detector that sends an emergency alert to the Safety Link call centre via the Home Based Alarm unit.

The detectors are photoelectric, interconnected and contain a 10 year lithium battery back-up.

Door or Gate Exit Sensors*

The Door or Gate exit Sensors will send an alert to the Home Based Alarm unit when a door or gate has been opened. The Home Based Alarm unit will then contact Safety Link's monitoring centre.

Customised Triggering Switches

Safety Link supports those at-risk with simple-to-use and practical solutions. Clients with different levels of ability can rest assured that Safety Link is able to supply a triggering device that best suits their needs, even if it means full customisation.

Home Based Alarm*
SEVEN

The Safety Link 4G Home Based Alarm unit comes with either a neck or wrist pendant of your choice. The dual SIM alarm has Telstra 4G or Optus 4G network coverage, a long life back-up battery, and an external aerial for enhanced signal.

The pendants are waterproof and have a range back to base of 300 metres.

Mobile Alarm*
GO Trek

The Safety Link Mobile Alarm is ideal for those on the move. With its long life battery (up to 2 months), easy recharging facility, and fall detection capability.

The GPS enabled Mobile Alarm is waterproof and has national 3G coverage via Telstra.

Home Based Alarm* & Mobile Alarm*
SEVEN & GO Trek

Safety Link's GPS enabled Mobile Alarm, is Medical Alarm System compatible which allows added levels of redundancy in case of network failure.

This also permits the use of additional Safety Link accessories and services, e.g. smoke detectors, extra pendants, daily calls and exit sensors etc.

Fall Detector

Provided in lieu of a standard pendant

An advanced pendant offering cutting-edge fall detection capabilities and up to a 300 metre range. Suitable for those who are living or working alone and are at risk of falls.

While every effort is made to capture the range of falls possible, some falls may not register. In such instances, the pendant button should be used.

Easy Press*

Provided in lieu of a standard pendant.

Designed for clients with dexterity issues, Safety Link's Easy Press Pendant has a large contact area making it easier to press in case of an emergency. The Easy Press pendant has a 300 metre range and is compatible with Safety Link's alarm base unit.

A Variety of Pendants

Safety Link has a variety of pendants that can provide the appropriate comfort and reassurance to users of the medical alarm unit.

The Neck Pendant provides the ability to discretely conceal the pendant underneath clothing.

The Wrist Pendant is ideal for those clients who may be unable to wear a neck pendant due to individual constraints.

The Brooch Pendant is attached to a chrome brooch pin for fastening to clothing.

Wall Buttons

A wall mounted wireless trigger which communicates with the Home Based Alarm unit.

The button offers a fixed point for users to raise an alert for assistance.

Key Safes

A Key Safe is a convenient, secure and easy-to-use device that can hold up to 3 keys and allows entry during emergencies or if locked out of the house.

Key Safes are available in a Wall Style or Loop Style.
