

Door or Gate Exit Sensors

A sensor device that sends an emergency alert to the Safety Link call centre via the alarm base unit.

When activated, the base unit will alert to let an individual know that a door or gate has been opened.

About this product's features:

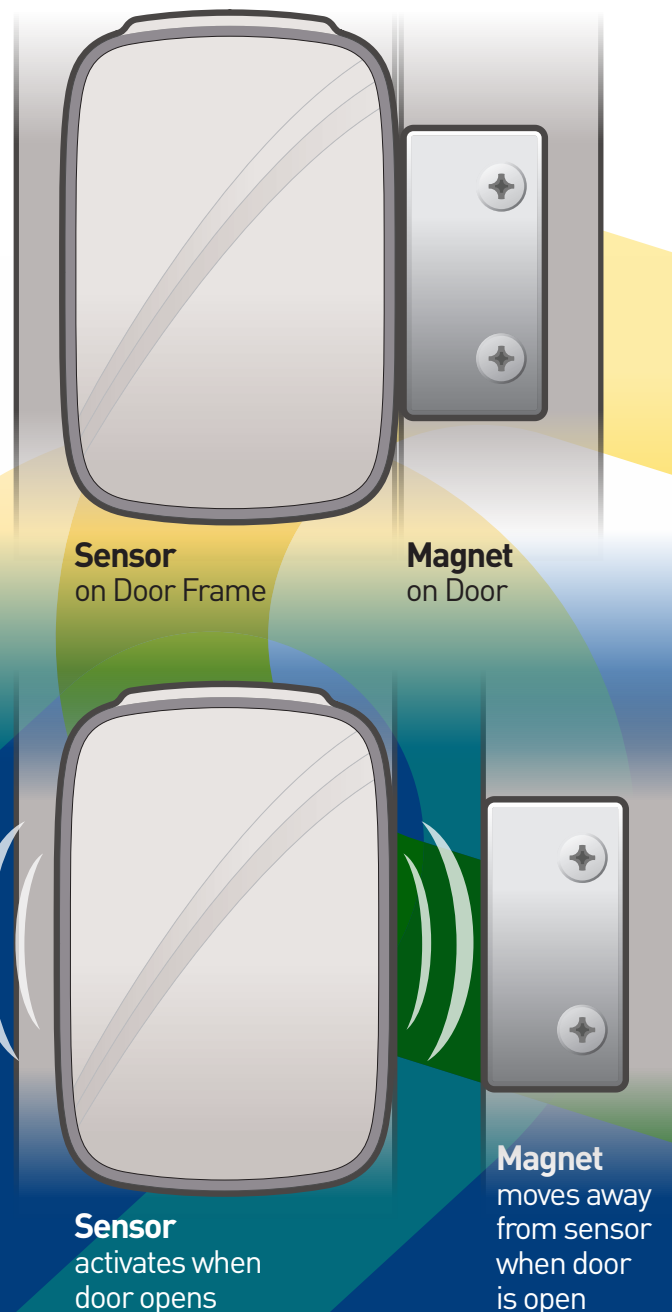

- Range of up to 300 metres to the alarm base unit
- Battery life with typical use is 2 years.
- All Sensors are water resistant.
- Magnet strength allows for a gate or door opening of approximately 25mm.

The Door or Gate Exit Sensor will alert when a door or gate is opened during pre-set hour. The timing is set in the alarm base unit and can be customised for individual requirements.

This alert can be cancelled at the alarm base unit by pressing the CANCEL button.

The Exit Sensor can be easily attached to the door frame, using foam pads or 3M adhesive strips. The magnet it is paired with, is attached to the door using foam pads or screws.

It can be used on internal and external doors hinged on either side.
