

# Key Safes

# Safety Link

## What are Key Safes?

A Key Safe is a convenient, secure and easy-to-use device that can hold up to 3 keys and allows entry during emergencies or if locked out of the house.

## Features: Both Key Safe styles have many features

- Wall Mount holds 2 keys
- Loop Style holds 3 keys
- Easy installation
- Weather proof cover
- Durable metal frame
- Easy button press
- Simple coding process

## How do they work?

The Wall Mount Key Safe can be installed on a hard surface such as a wall or a post.

The Loop Style Key Safe can be easily fitted to a pipe or railing (similar to a padlock).

Key Safes open using a numeric code you choose and set yourself.

The Key Safe information can be added to Safety Link's system to alert ambulance staff of its location and code so they can gain access in emergencies and provide assistance.
