

# Emergency Assistance at the Touch of a Button 24/7

We keep you connected  
wherever you are...

## Why Safety Link?

Safety Link helps people maintain independence and continue living in their own home longer.

With over 40 years experience in the Personal Response Industry, we offer peace-of-mind to individuals and their loved ones, knowing that help is readily available at the touch of a button.

Safety Link always exceeds the Australian Standard AS 4607-1999 of 95% of alarm calls answered within two minutes, so you know we'll always respond when you really need us.

## Home-Based Alarm

The ideal solution for those who spend most of their time in the home.

This system uses a lightweight, water resistant pendant alarm that is worn discreetly – either around the neck, as a brooch or on the wrist like a watch.

When activated, an alert is sent to Safety Link, where our friendly staff will respond through the alarm base unit to quickly ascertain what help you need.

Easy to install

Fall-detection pendant (optional)

Works via two separate mobile networks to keep you connected

Back-up battery

## Mobile Alarm

Whether you are walking the dog, down at the shops or gardening in the backyard, the Mobile Alarm offers a layer of security and freedom for those on the move.

- Uses Global Positioning System (GPS) technology to locate where you are

- Has advanced two-way voice communication capability so we can talk with you easily

- Optional fall-detection

## Accessories

Safety Link offers a variety of accessories for an extra layer of reassurance.

- Custom alarm triggers

- Smoke detectors

- Antenna boosters for areas with limited mobile coverage

- Key safes

## Access to your premises

A lot of people may not realise that Emergency Services need ready access to their homes during an emergency. As Emergency Services are generally not allowed to gain entry using force to open doors or windows, a spare key stored in a secure Key Safe or discreetly hidden is often the best option.

Safety Link keeps you connected

## 1. A simple press of a button

A pendant is worn and used by the client to summon help if needed.

## 2. Our friendly staff

When pressed, the pendant sends an alarm to Safety Link's Response Centre.

## 3. Help when you need it

Safety Link will organise assistance any time, day or night, 365 days a year.
